Demographics (active)

Institutional Outbreaks

0

Active Institutional Outbreaks

Case Outcomes

92

Confirmed ongoing cases

2,636

Resolved cases (no longer infectious)

69

Deceased cases

Influenza (Flu) Activity in Our Region

This map indicates the level of flu activity in the Southwestern Public Health region as well as surrounding public health unit regions.

The flu activity level in an area is determined by the number of laboratory-confirmed cases of influenza and the number of outbreaks in hospitals, long-term care homes and retirement homes.
