

Correct Hand Sanitizer Use

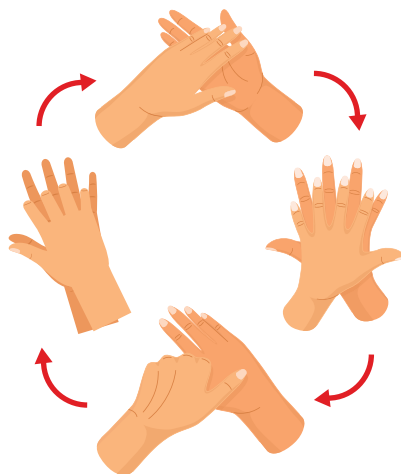

1 Apply one squirt

- Use a sanitizer with 60% to 90% alcohol

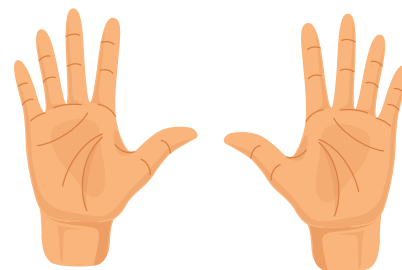

For healthcare settings, at least 70% alcohol should be used

2 Rub hands together

- Make sure to spread sanitizer all over your hands, palms, and between fingers

3 Rub until dry

- This should take 15 seconds if enough product is used

REMEMBER

Hand sanitizer should only be used when hands are not visibly dirty. Wash with soap and water if you see dirt on your hands.
